

KUNAL SHINDE

Security Engineer — Information Security

Mumbai, India | +91 9139866865 | skunal148@gmail.com | linkedin.com/in/kunal-shinde

PROFESSIONAL SUMMARY

Security Engineer with 5 years of hands-on experience across SOC operations, incident response, vulnerability assessment and penetration testing (VAPT), network security monitoring, and cloud security. Lead end-to-end incident response including a live business email compromise (BEC) investigation and administer SIEM, EDR/XDR, IDS/IPS, and firewall platforms. Build Python automation for alert triage, author security SOPs, maintain the enterprise risk register aligned to NIST CSF and ISO 27001 risk-management practices, and run the organization-wide security awareness program.

CORE COMPETENCIES

SOC Operations & Alert Triage | Incident Response & Digital Forensics | Vulnerability Assessment & Penetration Testing (VAPT) | Network Security Monitoring (NSM) | SIEM Engineering | EDR / XDR | Cloud & Identity Security (Microsoft Entra ID, Intune, Conditional Access) | Firewall & IDS/IPS Management | Data Loss Prevention (DLP) | Threat Intelligence & Threat Hunting | MITRE ATT&CK | Risk Assessment & Risk Register (NIST CSF, ISO 27001) | Security Automation (Python) | Security Awareness Training

TECHNICAL SKILLS

SIEM & Monitoring: Elastic SIEM, Security Onion (Suricata, Zeek), Wireshark, network security monitoring (NSM)

Endpoint & EDR/XDR: CrowdStrike Falcon, Bitdefender GravityZone, endpoint compliance, custom DLP / Data Protection rules

Cloud & Identity: Microsoft Entra ID (Azure AD), Intune MDM, Conditional Access, MFA, Azure SSO, Exchange Online, CyberArk

Network Security: pfSense, pfBlockerNG threat-intelligence blocklists, Zscaler, firewall policy management, VPN, IDS/IPS

Vulnerability Management: Nessus, Nmap, CVSS scoring, remediation tracking, penetration testing coordination

Scripting & Automation: Python, SQL, regular expressions (regex), VB.NET

GRC & Operations: Risk register management, NIST CSF, ISO 27001 practices, SOP development, GLPI ticketing, incident reporting

PROFESSIONAL EXPERIENCE

Security Engineer — INFOSEC (Security Administrator, May 2024 – 2025)

May 2024 – Present

Microscan Infocommtech Pvt. Ltd. — Mumbai, India

- Led end-to-end incident response for a live business email compromise (BEC) attack: traced the scripted sign-in through Microsoft Entra ID logs, contained the account via sign-in blocking and an Exchange Online transport rule, remediated with credential reset and MFA enforcement, and blocked the malicious payload fleet-wide with a custom EDR Data Protection (DLP) rule.
- Run daily SOC alert triage on a multi-terabyte Security Onion NSM deployment (Suricata, Zeek, Elasticsearch), reconciling IDS detections against pfSense/pfBlockerNG threat-intelligence auto-blocks and GLPI tickets; built a Python automation tool that classifies alerts and outputs the daily gap list of unblocked, unticketed attacker IPs.
- Manage the quarterly VAPT program across 4 business entities, remediation trackers covering 185+ Nessus-validated findings with Critical/High/Medium/Low severity and CVE mapping and authored the 13-phase internal web application penetration testing SOP with severity-based SLAs and mandatory retest before closure.
- Deploying Microsoft Intune MDM with Entra ID Conditional Access (MFA and compliant-device policies) across the corporate Windows fleet, including enrollment design and compliance policy configuration.
- Maintain the enterprise risk register, risk identification, impact analysis, ownership, treatment, and exception/acceptance workflow, aligned to NIST CSF and ISO 27001 risk-management principles.
- Launched a weekly organization-wide security awareness program (phishing, data handling) and lead POC evaluations and formal risk assessments for new security tooling.

Network & Security Administrator

Aug 2021 – Apr 2024

Zycus Infotech — Mumbai, India

- Monitored and managed firewall, antivirus, Zscaler web security, and DLP platforms for continuous threat detection and response; designed antivirus and DLP dashboards for leadership reporting on threat trends.
- Performed proactive threat hunting and incident response using CrowdStrike Falcon EDR, and ensured endpoint agent compliance with organizational and regulatory standards.
- Configured Azure SSO / IAM integrations across Bitsight, CyberArk (privileged access management), Elastic SIEM, and MongoDB.
- Conducted network security assessments, identified vulnerabilities, drove remediation, and enforced firewall policies to prevent unauthorized access.

Technical Support Executive

Dec 2019 – Mar 2021

Spot Manpower Services (The Malad Sahakari Bank Ltd.) — Mumbai, India

- Resolved hardware, networking, and software issues in a banking environment; ran daily EOD/BOD and month/year-end batch processing on the Finacus core banking platform, and supported mobile banking and debit card systems.

Junior Developer

Jun 2019 – Dec 2019

Sam Computers — Mumbai, India

- Developed and maintained an inventory management system using VB.NET and SQL; implemented change requests with regression testing.

EDUCATION

Bachelor of Engineering — Information Technology

2017

Mumbai University, India

OTHER ACHIEVEMENTS

Side Projects

- Built an automated vulnerability management tool integrated with Nessus and GLPI for ticket creation and vulnerability tracking, reducing ticket creation time from approximately 5 days to under 5 minutes.
- Developed the organization's internal Rewards & Recognition (R&R) portal with Microsoft SSO and SCIM integration for centralized authentication and automated user provisioning.
